## HOME IS WHERE THE REVOLUTION IS

*THE MISERY HAS NO END –  
as long as the peoples do not put an end to the barbarity of the war against humanity*

One cannot close one's eyes to it: To save their bare lives, to escape barbarism and war and its devastation of entire countries, hundreds of thousands are on the run. On the run to escape their scorched earth, where they do not seem to be given the option of once again, with their power of revolution, of the proletariat and of the people, to fight against the imperialist war-mongers together with their very own domestic reaction. An escape, on which already tens of thousands found their death or find their end in barbed wire, floating in the Mediterranean Sea, in camps and imprisonment by those, who destroyed their countries or were and still are the war parties.

One cannot close one's eyes to it: That the imperialist war parties have been waging genocide - whether in Afghanistan, whether on Arab territory, whether on the terrain of the USSR or other former People's Republics - for decades, the old imperialist countries, the U.S. as well as German imperialism in association with the EU and with the active participation of the reaction and counterrevolution of the respective ruined states and countries, and that the flight of the survivors of war and barbarism ends in one of the greatest migrations of peoples in the history of mankind, which imperialism can neither stop nor make disappear. No encirclement, no barbed wire, no border fence and no wall around entire states can stop people who have looked death in the eye. The " Fortress Europe ", the EU, is just as much an illusion as the idea that there can be a humanism in this human tragedy in barbarism or that such a humanism could counter it.

No capitalist state, no state of the counterrevolution, all of which have led and still lead the war, the civil war against their own people and have driven hundreds of thousands citizens into such misery and poverty as into destruction of these countries - whether in open war against their own people or by holding them down with daily state violence and driving them to flee, whether from Poland, whether from Belarus or whether from today's "Baltic States"; or like the annexation state FRG, which made the citizens of the GDR vagabonds and thereby became part of the worldwide peoples` migration - will solve the flight worldwide, whether in Europe or elsewhere, in a peaceful and humane way. Only the oppressed and tormented peoples and their workers' movement are capable of this. The home of the refugees is the revolution. Only the national and international workers' movement is capable of making imperialism and the counterrevolution in the former socialist countries flee. By overthrowing the warmongers and expropriating the expropriators. And in its place establish the dictatorship of the proletariat. Then and only then will the peoples and their people have their Home back, in socialism. And for this all working classes in their countries have to stand, because they have no " motherland " under the rule of the war of the barbarism of their ruling classes. The expulsion from the homeland finds its end in: "Proletarians and peoples of all countries unite!" Let us make the world a place of peace, without displacement and flight from death. THE REVOLUTION is our Home - which creates a homeland for all the displaced and those who remained of the people!
